

Comprehensive Diabetes Care – A1c Control and Poor Control (CDC-A1c)

For the commercial, Medicaid and Medicare lines of business

Comprehensive diabetic care – hemoglobin A1c testing (CDC-A1c) measures the percentage of members 18 to 75 years old with diabetes (type 1 or 2) who had hemoglobin A1c testing and either have their blood sugar controlled or under poor control. Below are the Current Procedural Terminology Category II (CPT® II) codes that indicate the control level.

Code	Code Type	Definition
3044F	CPT II	Most recent hemoglobin A1c level less than 7 percent
3045F	CPT II	Most recent hemoglobin A1c level 7 to 9 percent
3046F	CPT II	Most recent hemoglobin A1c level greater than 9 percent

CPT codes are the Current Procedural Terminology codes developed by the American Medical Association.
